Comments: -Analysed phospholipids include PC, 1-LPC, 2-LPC, PI, LPI, PS-Na, LPS, SPH, PE, LPE, APE, PG, DPG, PA and LPA.

- -Integrals of Phospholipid signals, which are not evaluable or belong to not listed Phospholipids, are recorded as "other".
- -Phospholipids that are not detected/have a value of "0" are filtered out and do not appear in the individual list.
- -Due to signal overlapping of PI and 1-LPC the content of 1-LPC was calculated as 10% from 2-LPC
